

ICOAS '18

6th International Conference on
Organic Agriculture Sciences

November
7 – 9, 2018
Eisenstadt

Call for abstracts and session proposals

The **submission period** for presentations at the next **International Conference on Organic Agriculture Sciences (ICOAS)** to be held 7 – 9 November 2018 in Esterházy Palace in Eisenstadt, Austria, is **now open**.

Please note that in addition to submit an abstract which will be attributed to a session, interested applicants also have the possibility to propose a full session.

ICOAS 2018 is jointly organised by [FiBL](#) and [Esterhazy Betriebe GmbH](#). ICOAS focuses on the dissemination of the latest research results in organic agriculture and the knowledge transfer between actors in East- and Central-Europe.

Contributions on one of the following topics related to the conference theme **“Dynamic developments in organic research – strengthening partnerships across Europe and beyond”** are welcome:

Organic production

- Organic breeding and seed production
- Crop production
- Animal husbandry and welfare
- Sustainable bee keeping

Socio-economic challenges

- Urban-rural relations – production, delivery and consumption
- Development of local organic markets – possibilities and limitations
- Complex value chains/ Sustainable food supply chains and organic trade
- Farm Diversification

Consumers' perspectives and expectations

- Values across CEE countries influencing organic production and consumption
- Food quality, safety, health, nutrition and authenticity
- Community supported agriculture – Agriculture supported communities

ICOAS '18

6th International Conference on
Organic Agriculture Sciences

November
7 – 9, 2018
Eisenstadt

Knowledge transfer and dissemination

- Effective capacity building and partnerships across the value chain
- Status quo of organic research across countries (basic research, applied research, participatory research)
- Better sharing of research results

Analysis and assessment

- Sustainability assessment
